The Speakers

Ken Buck: Candidate for U.S. Senate

"The Obama administration and Democrats in Congress have put the United States on course to a government-run healthcare system that infringes on personal freedom, violates states' rights, will ration medical care and could potentially bankrupt our country."

~ From Buckforcolorado.com

Rohini Ravindran: Representing Michael Bennet, Candidate for U.S. Senate

"We have an urgent and moral obligation to change the health care system in this country so that every American has affordable access to quality health care and so that we can relieve our families, small businesses, and economy from the catastrophic impacts of high health care costs. We must face this problem head-on and start working towards solving it this year."
